## Summary

I am a driven and enthusiastic person with a passion for building tools. I have successfully completed courses in data science and web development from various platforms. My data science course was completed through IBM, and I completed my web development course through MAAC, a highly-reputed institution in Hyderabad.

I have a strong knowledge of coding and am able to build various types of websites. I am proficient in handling both the front-end and back-end sides of web applications. Additionally, I am skilled in integrating AI tools and building machine learning models, as well as performing data visualization, data wrangling, and data analysis tasks

## Experience

*Front-end Developer, Freelancer, Hyderabad.*

I have been building UI-based websites for clients since completing my course at MAAC in 2019.

Since then, I have worked on various types of website projects in categories such as business websites, blogs, portfolios, non-profit organizations, and eCommerce layouts.
